

SPRINT - 1

Team ID	PNT2022TMID48449
Project Name	Retail Store Stock Inventory Analytics

Sprint-1

- Data collection
- Data preparation

Data preparation:

The screenshot displays the IBM Cognos Analytics with Watson interface, showing the process of preparing data for analysis. The interface is divided into two main sections: a left-hand navigation pane and a central data grid.

Top View (Initial State):

- Navigation Pane:** Shows a tree structure under "Data module". The "data" module is selected, with sub-modules "venda", "estoque", and "preco" listed below it.
- Data Grid:** Displays a table with the following columns: "Row Id", "data", "venda", "estoque", and "preco". The data is organized into 14 rows, each representing a date from 2014-01-01 to 2014-01-14.

Bottom View (After Data Preparation):

- Navigation Pane:** The "mock_kaggle.csv" file is selected, and the "M_Data" module is highlighted.
- Data Grid:** The table now includes an additional column, "M_Data", which is positioned at the beginning of the data rows. The rest of the table structure remains the same.

The interface also includes a search bar at the top, a "Properties" panel on the right, and a Windows taskbar at the bottom showing the system clock and weather.

Row Id	data	venda	estoque	preco
1	2014-01-01	0	4972	1.29
2	2014-01-02	70	4902	1.29
3	2014-01-03	59	4843	1.29
4	2014-01-04	93	4750	1.29
5	2014-01-05	96	4654	1.29
